

BL3evo

**TURBO. RELENTLESS.
ROBUST. ERGONOMIC.**

The new BL3Evo blower combines the power of the Cifarelli C7 two-stroke engine with a patented turbo suction system that pre-separates dust and debris before reaching the filter. The machine features a side air filter and a blower tube with a quick, tool-free extension adjustment. Its design enhances maneuverability and allows working under plants without branches getting caught in the filter.

CIFARELLI The fruit of the Earth in good hands. Since 1967
